

Position location : Phoenix, AZ

At Neustar, we believe in rewarding individuals for a job well done. This is one of the ways we attract and retain the most talented individuals. In addition to highly competitive compensation with performance-based commission, we offer our employees a very attractive benefits package. NeuStar's talented and diverse workforce combines deep subject matter expertise, broad industry knowledge and boundless ingenuity. Our employees are the reason why our company is quietly revolutionizing the way the world communicates.

Purpose of Job

The Software Architect position will work on the design and develop next generation software and systems architecture for supporting our global directory platform. This includes researching new and existing technologies, prototype development for next generation system and database architecture and new product/service offerings.

Key Tasks

- Design and develop next generation software and systems architecture for our directory platform
- Design and development of tools and systems to help manage and optimize existing systems and next generations systems
- Optimize our existing systems infrastructure and interaction with a multitude of existing applications.
- Ongoing research, architecture, and engineering of our next generation systems infrastructure to improve speed, reliability, and capacity as we continue to acquire new customers and develop and deploy new products.

Minimum Education

B.S. Computer Science. Master preferred

Technical Skills

- C/C++ guru
- Oracle (or other RDBMS) development experience
- TCP/IP server development in a Unix environment
- Multi-threaded development in a Unix environment
- Network Engineering experience
- Experience with DNS, SMTP etc.
- Python knowledge a plus
- System/kernel level development with Linux, FreeBSD or Solaris
