

Neustar® Operational Solutions Simplify Order Management

Reduce complexity with one interconnection to order and publish.

SOLUTIONS TO ENSURE YOU

- Automate Workflows
- Communicate with Other CSPs
- Publish Downstream and Off-Network

Automate order and fulfillment with an end-to-end solution for all network types that fosters efficiency and enables growth. Neustar enable seamless transactions via a single, universal interface into all of the gateway services you use. Included change management means your orders comply with all FCC, FTC, industry and carrier standards and rules.

Inter-Carrier Communications

Increase efficiency and accuracy and eliminate manual processing by automating the interconnections to your trading partners. We provide a single interface that lowers operating costs and reduces errors.

Ordering Services

Order all service elements associated with local service requests (LSR). Our Access Service Request (ASR) expedites provisioning and network capacity expansion through an electronic-bonding process to order access from multiple providers.

Wireless Number Portability Solutions

Our Intercarrier Communications Process (ICP) solution uses a clearinghouse model to automate porting between wireless carriers. Neustar provides the only complete, automated, intermodal porting solution (between wireline and wireless) in the U.S.

Customer Accounts Record Exchange (CARE)

Transact with local and long distance providers to exchange end user account information.

Service Order Administration (SOA)

Our SOA solutions provide automated solutions that help turn number ports into revenue with a direct interface with the NPAC via a GUI or API and single log-in for all NPAC regions.

COMMUNICATIONS SERVICE PROVIDERS DEPEND ON NEUSTAR FOR

- Manage growing complexity
- Reduce the burden of compliance
- Maximize the use of limited resources

Publishing Services

Publish your customer's information to the NPAC and other downstream databases and systems through a universal interface and workflow. Update caller ID databases, directory listing services and long distance service providers so customers are identified as required and as they request.

Caller ID/Caller Name Services

Provision and deliver accurate, current and consistent Caller ID information that your wireline and wireless subscribers expect. Our central data repository delivers the industry high quality caller name coverage at a competitive cost and with little complexity.

LIDB

Neustar's Line Information Database contains line information such as a service profile, 10-digit line numbers, service provider ID, equipment indicator, and billing specifications.

Directory Listing Solutions

Fulfill directory listings during order provisioning to meet publishing and directory assistance obligations faster and more accurately. Publish to white and Yellow Pages and online. Generate revenue by giving your residential and business customers more options.

Enhanced 911 (E911)

During activation, provision customers for proper routing to local emergency response facilities and comply with all federal, state, county and local codes.
